ZeroTAM

Veeam Backup Expert Advisory

“Zero compromise.” Backup security starts with visibility, guidance, and proof.

The problem: Every backup system looks fine until recovery time. Busy IT teams need Veeam architecture guidance and a trusted advisor, not just another ticket system.

What ZeroTAM provides

- A dedicated backup security expert who knows your environment.
- Proactive health checks, Veeam architecture reviews and upgrade planning.
- Quarterly executive briefings that speak risk and compliance language.
- Priority access to an expert who already knows your environment during a crisis.

Five layers, zero compromise

ZeroMON	ZeroTAM	ZeroPEN	Stork365	ZeroVault
Monitoring	Advisory	Pentest	M365 Backup	Cloud Storage

Scope

Veeam architecture review · hardening & security posture · capacity planning · recovery strategy (RTO/RPO) · ransomware readiness · upgrade roadmap · compliance & audit support.

Get started: Complete the onboarding form and we’ll propose an advisory plan and SLA tailored to your environment.
